

**Southwest Ranches is working towards our
Community Habitat Certification
and we are just 19 points away!**

**That means we ONLY need 19 more residents to
commit to wildlife by certifying your yards.
(If you have not already done so)**

If you would like to do more for wildlife,
consider the following:

FOOD - Plant native plants that produce flowers for pollinators
and seeds/berries for birds.

WATER - Include a bird bath or butterfly puddling station

COVER - Provide cover and shelter with dense shrubs and trees

PLACES TO RAISE YOUNG - Plant host plants for
butterflies.

SUSTAINABLE PRACTICES - Put away chemicals that
pollute our water supply. Natural gardens are better for you, your
family and wildlife.

Please do your part to help Southwest Ranches
become a Certified as a Community Wildlife
Habitat.

Respectfully, your Community Wildlife Habitat Team Leaders
